Your **managed accounts** hold portfolios we advise on; each may hold more than one, and each portfolio holds a little **portfolio cash** that counts in its value and its return. Your **execution-only account** holds securities you bought without advice — we arranged those trades but did not assess whether they suit you. Your **wallets** hold cash that is yours to spend or invest: that is what available to invest means, and it is excluded from every return in section 2. Total value converts the dollar side at the display rate above. It is a value and never carries a return, because a return across two currencies would mix investment performance with currency movement.

Custodians — South African securities and cash are held with ABSA Bank; United States securities and cash with Alpaca Securities. The display rate of USDZAR 18.42 is a Refinitiv mid rate struck at 17:00 SAST on 31 August 2026 and is used only to convert values into your reporting currency.

2 How your investments performed — SA Momentum

ZAR MANAGED ACCOUNT · ZAR-MAN-100482

Movement in the quarter	ZAR
Value on 1 April 2026	R 248,534.86
Money in — cash from your wallet used to buy securities	+ R 40,000.00
Money out — sale proceeds returned to your wallet	– R 20,000.00
Money out — income swept into your wallet	– R 2,675.15
Net money in	R 17,324.85
What your portfolio earned	R 9,461.94
Value on 31 August 2026	R 275,321.65

2 How your investments performed — Apple Inc.

USD EXECUTION-ONLY ACCOUNT · USD-EXO-100482

Movement in the quarter

USD

Value on 1 April 2026	—
Money in — cash from your wallet used to buy shares	+ \$ 880.10
Money out — dividends swept into your wallet	– \$ 1.09
Net money in	\$ 879.01
What the holding earned	\$ 36.59
Value on 31 August 2026	\$ 915.60

The holding was opened inside this quarter, so there is no opening value and no full-quarter return. **Profit and loss on what you paid is +\$ 35.50, or +4.0%.** It differs from what the holding earned by the \$1.09 dividend that was swept to your wallet: the position earned it, but it was paid away rather than kept inside the account. No advice was given on this holding, so no advice fee was charged and no suitability assessment was made.

2.4 How these figures were worked out

The portfolio's return is the time-weighted return, and it is the percentage shown on your Concise Statement. Your own buying and selling is removed from it entirely: the quarter is cut into a separate period at every instruction and every income sweep, and those periods are chain-linked. It answers "how did the investments themselves do?"

Your own return is the money-weighted return — the same calculation as an internal rate of return, solved over this quarter rather than over a year. It weights every amount invested, withdrawn and swept out by how long that money was in the account, so it reflects your own decisions. It answers "what did I earn?"

Why they differ. This quarter the Global Core figures differ by 0.5 percentage points. Money that goes in shortly before a strong run earns more than the average, and money that goes in before a weak stretch earns less; the gap between the two numbers is the value or cost of that timing.

Before and after fees. Your fees are debited from your wallet, so they never leave an investment account and the portfolio's own return is unaffected by them. The after-fee figures deduct those fees from the portfolio's value on the dates they were taken, so you can see what they cost you. A fee is a reduction in value, not a withdrawal, which is why it is treated differently from your own money coming out.

Income. A distribution reduces a fund's price on the day it goes ex, so the income has to be counted somewhere or the statement would show a loss that never happened. Income declared before 1 April but paid inside the quarter — R2,134.77 on the SA Momentum portfolio — is carried in the opening value as a receivable, so it is not counted twice.

Currency. Each account is measured in its own currency. The Total value on page 1 converts the dollar side at the display rate, but no return is ever converted or blended, because a cross-currency return mixes investment performance with currency movement and the two cannot be told apart afterwards.

Valuation. Units held × the closing price, every trading day. The Global Core portfolio is priced on 62 United States trading days and SA Momentum on 60 Johannesburg trading days, using each fund's daily net asset value. Prices are rounded before they are multiplied, so units × price equals the value printed beside it. Periods under a year are never annualised — a three-month result stated as an annual rate implies a year that has not happened.

3 What you own

Direct securities — execution-only · bought without advice

Holding	Exchange	Shares held	Average cost	Price 30 Jun	Value 30 Jun	You paid	Profit & loss
Apple Inc. Common Stock AAPL · US0378331005	NASDAQ	3.0000	\$ 293.37	\$ 305.20	\$ 915.60	\$ 880.10	+\$ 35.50

What these holdings are expected to pay you — from each fund's current distribution rate

Account	Estimated yield	Estimated income a year	Paid to
SA Momentum · ZAR managed	4.3%	R 11,838.83	South Africa wallet
Global Core · USD managed	2.5%	\$ 1,214.00	Global wallet
Apple · USD execution-only	0.5%	\$ 4.58	Global wallet

An estimate from what each holding is paying now, at today's units — not a forecast and not guaranteed. Yield x value reproduces the income figure on every row.

Every figure in this section is a position as at 31 August 2026, not a total for the quarter. **What you paid** is the weighted average cost of the units you still hold, including brokerage; **profit and loss** is the difference between the two — you have not received it and it will move with the market until you sell. Fund names, tickers, ISINs and each fund's TER come from the Vault22 investment management records. Portfolio cash earns interest at 3.90% a year on the dollar side and 7.25% on the rand side; it belongs to the portfolio and is not the same thing as your wallet.

4 What you bought and sold

SA Momentum · ZAR managed account · one instruction is split into one market order per fund

Date	Type	Market orders	Consideration	Brokerage	Cash effect
22 Apr 2026 Lump-sum investment	Buy	7	R 39,814.00	R 186.00	– R 40,000.00
5 Jun 2026 Partial withdrawal	Sell	7	R 20,092.63	R 92.63	+ R 20,000.00

Global Core · USD managed account

Date	Type	Market orders	Consideration	Brokerage	Cash effect
15 Apr 2026 Lump-sum investment	Buy	3	\$ 5,991.11	\$ 8.89	– \$ 6,000.00
30 Apr 2026 Monthly debit order	Buy	3	\$ 297.00	\$ 3.00	– \$ 300.00
29 May 2026 Monthly debit order	Buy	3	\$ 297.00	\$ 3.00	– \$ 300.00
10 Jun 2026 Partial withdrawal	Sell	3	\$ 3,004.50	\$ 4.50	+ \$ 3,000.00
30 Jun 2026 Monthly debit order	Buy	3	\$ 297.00	\$ 3.00	– \$ 300.00

Apple Inc. · USD execution-only account · a single trade in one security

Date	Type	Shares	Price	Consideration	Brokerage	Cash effect
15 Apr 2026 AAPL · order placed by you	Buy	1.5000	\$ 289.30	\$ 433.95	\$ 1.00	– \$ 434.95
12 Jun 2026 AAPL · order placed by you	Buy	1.5000	\$ 296.10	\$ 444.15	\$ 1.00	– \$ 445.15

Other activity · events that change your units without moving cash

Date	Account	Event	Effect on units	Cash effect
—	—	No corporate actions, splits or transfers in specie this quarter	—	—

Brokerage is charged inside each order: the consideration plus brokerage equals the cash that left your wallet, and the total is already inside what you paid for your holdings in section 3. It is never billed to your wallet as a separate line. A managed portfolio takes one instruction from you and places one market order per fund at the target weights; an execution-only order is placed by you in a single security.

Total					\$ 307.61	\$ 45.48	\$ 262.13

Apple Inc. · USD execution-only account

Holding	Paid	Ex date	Units	Rate per unit	Gross	Tax withheld	Net swept
AAPL US treaty rate 15%, W-8BEN on file	15 May	11 May	1.5000	0.853333	\$ 1.28	\$ 0.19	\$ 1.09
Total					\$ 1.28	\$ 0.19	\$ 1.09

Rate per unit is shown at the precision the fund declares it at, so units multiplied by the rate reproduces the gross amount exactly. The ex date is when the price drops by the distribution; the paid date is when the cash arrives. Tax is deducted before the money reaches your wallet: United States dividends at the 15% treaty rate under the South Africa–United States treaty with a W-8BEN on file, and South African equity distributions at 20% dividends tax. Interest distributions and interest on portfolio cash are paid gross and are taxed in your own hands. Because all of it is swept to your wallet, income counts as money out.

Fees on the Global execution-only account

None. No advice fee, no platform fee and no custody fee is charged on an execution-only order. The only cost is brokerage — charged inside each order at 0.15% of the consideration with a \$1.00 minimum per instruction, plus VAT — and shown order by order in section 4. It never touches your wallet and is never added to the fee totals above.

Other charges · debited from the ZAR wallet

Charge	Ex VAT	VAT 15%	Total
Vault22 Premium subscription R150.00 a month · April, May, June	R 450.00	R 67.50	R 517.50
Identity verification Included with Premium (R30.00 on Free)	R 0.00	R 0.00	R 0.00
Total other charges	R 450.00	R 67.50	R 517.50

Your subscription buys the whole rate card, not one fee: on Free the advice fee is 0.85% and the platform fee 0.50% a year, while Premium takes 40% off the percentage rates and waives the platform fee entirely. It is a single charge for your whole account, not per account, which is why it is shown here rather than split between them. Total debited from your Global wallet this quarter: \$40.47, including \$5.28 of VAT. Total debited from your South African wallet: R866.92, including R113.07 of VAT. Brokerage is charged inside each order, is already inside what you paid for your holdings, and is shown per order in section 4. It is deliberately not totalled here: adding a charge that never touched your wallet to the charges that did would count it twice.

8 Notes and definitions

Term	What it means
Total value	Everything you hold with us, converted into your reporting currency at the display rate: your investments plus the cash in your wallets. It is a value only and never carries a return.
Invested	The value of your managed portfolios and direct securities. It excludes wallet cash.
Available to invest	Wallet cash. Portfolio cash is not available to invest, because it already sits inside a portfolio.
Managed account	Holds one or more portfolios we advise on. Suitability is assessed and an advice fee applies to each amount invested.
Execution-only account	Holds securities you bought without advice. We arranged the trades; we did not assess whether they suit you. No advice fee is charged.
Portfolio cash	A small cash holding inside a portfolio, part of its value and its return, earning 7.25% a year in rands and 3.90% in dollars. It is not your wallet.
Profit and loss	The difference between what a holding is worth and what you paid for it. You have not received it and it will move with the market until you sell.
Display rate	A single mid-market exchange rate struck at the reporting time, used only to convert values. Shown with its source and time.
Dealt rate	The rate you actually received on a conversion. Shown in full precision, because rounding it would stop the amounts reconciling.
Goal	A target you have attached an investment to. A goal does not change how the investment is managed or valued.

Pricing. A listed holding is valued at its closing auction price — what you could have realised on the day — not at the fund's net asset value, because an exchange-traded fund trades at a premium or a discount to it. Net asset value is used only on a day the holding did not trade. Where a holding's home market was closed on a day its listing market traded, the previous close is carried forward and that price is stale by one trading day. Each account is priced on its own trading calendar. Prices are rounded before they are multiplied, so units x the printed price equals the printed value.

Tax. Every figure here is shown pre-tax in your own hands. Withholding tax already deducted at source appears in section 5. Nothing in this statement accounts for South African income tax or capital gains tax on your side, and it is not a tax certificate. No securities transfer tax arises on the South African range, which holds exchange-traded funds rather than individual shares.

Prices, net asset values, distributions and exchange rates in this specimen are real. United States closes and the dollar/rand rate come from market data; South African daily net asset values come from the fund managers. The holdings are invented. Percentages are shown to one decimal; money is shown to the cent throughout, because this statement is the record your figures reconcile against.
